EUROPEAN LAW AI

Raquel López Hernández

13TH OF MARCH 2024

1 UNNACCEPTABLE RISK

Mass monitoring, manipulation of the population with damages, social qualification methods.

2 HIGH RISK

Access to education, employment, public services, police, judicial or democratic processes.

3 LIMITED RISK

Risks associated with lack of transparency, identity theft, deep fakes, emotion recognition, biometric categorization...

4 MINIMAL RISK

Most of the systems used today in the EU: spam filters, video games with integrated AI...

IN EDUCATION

- Student recognition systems.
- Evaluation systems with AI that are detrimental to the student and do not guarantee data protection.
- Ensure transparency of the systems used.
